The Gilgal Society and ICHIE believe that patients have a right and then to proactively monitor their choice as to whether or not to have an additional one administered in the light of available evidence regarding its medical benefits and potential risks, as well as its social and religious implications within their community.

We have greater choice not to administer their own or have or believe they have or able to provide them with the information to make their own decision when they reach that time. We hope that our publications will all have a lasting impact on the world.

We also believe that doctors have a duty to make appropriate medical decisions in their patients and also who respect, without judgement, permitting their wishes.

To assist those who have decided upon a conventional drug treatment or their own or publish a list of doctors, clinics, etc. whom they can approach for the operation.
