

The Gilgal Society

Publications

THE GILGAL SOCIETY is a not-for-profit publisher of medical educational material for the general public.

**Order in
Sterling**

Our current primary activity is providing accurate, medically approved, information about male circumcision and its benefits in terms of health, sexual satisfaction and self-image.

**Order in
Euros or US\$**

Our publications include a video of an adult male circumcision, a guidance booklet for those considering circumcision for themselves or their sons, and leaflets answering some of the questions parents, men (including teenagers) and women have about the operation, as well as information about preparation and after-care.

[Circumcision Information Reference Centre](#), an online resource set up to provide correct information and to counter the outright lies, half-truths and distortions with which anti-circumcision activists have flooded the web.

The Gilgal Society and ICIRC believe that parents have a right and duty to positively exercise their choice as to whether or not to have an infant son circumcised in the light of available evidence regarding its medical benefits and potential risks, as well as its social and religious significance within their community.

Where parents choose not to circumcise their sons at birth we believe they have a duty to provide them with the information to make their own decision when they reach their teens. We hope that our publications will aid them in carrying out this duty.

We also believe that doctors have a duty to make circumcision readily available to those parents and men who request it, without judgementally questioning their motives.

To assist those who have decided upon a circumcision for themselves or their sons we publish a list of doctors, clinics, etc whom they can approach for the operation.
